From the Desk of The Principal

Today is one of the most auspicious days for all of us. We have gathered here in the flag hoisting field of Assam Medical College and Hospital, Dibrugarh to celebrate the 74th foundation day of our beloved Institute.

This year is a year of exception. As you all know due to the outbreak of COVID-19 and ever since the detection of first case of coronavirus infection in November, 2019 in China the whole world has come down to a partial stand still in relation to socio-economic, health and many others spheres of development. The rules and regulations laid down by the Government both Centrally and locally for prevention and effective management of COVID-19 outbreak, we have had to restrict ourselves in many ways not only for celebration of occasions but even for academic and other activities. Hence, this celebration of our most auspicious day has to be done in a very smaller way for the first time in the history of Assam Medical College as I remember. It is very heartening that we have failed to celebrate this 74th Foundation Day of our alma-mater with so much of limitations unlike the other bygone years.

There will be no celebration of this much awaited day this year, neither in Dr John Berry White Auditorium nor in any other place. Even then, I on behalf of the entire family of Assam Medical College extend my heartfelt welcome to our distinguished dignitaries, respected former teachers, present faculty members, alumni,

staff, students and all grades of worker of Assam Medical College on the day of 3rd November.

Today with great respect we remember and pay our homage to the great philanthropist Dr John Berry White who took all the initiative to introduce modern medical education and practice in Assam in the beginning of 19th century. Way back in 1900 even before the establishment of Cotton College, John Berry White Medical School was established. Today we must salute this great and noble person who donated his entire life time earning of Rs.50000/- (present value is more than 30000 billion rupees) for establishing this Medical School which was later on converted to Assam Medical College on 3rd November, 1947 encompassing the US Military Hospital. This was formally inaugurated by the then premier of Assam Late Lokapriya Gopinath Bordoloi. Thus, the first Medical College of whole Northeast India was born and the new glorious chapter had started in the history of Assam.

Withstanding a lot of ups and downs, since its inception the role of this Pioneering institute for providing healthcare to the needy and poor patients towards medical education and research is commendable. The alumni of this Institute have also been rendering excellent services not only in this country but also in different parts of the world making us really proud.

This college is a well known medical college in India and it has the credit of producing more than 9172 graduates and 3836 post graduate doctors till date. Presently we enroll 200 undergraduates and 179 post graduate students in different categories. It is to be mentioned here that the selection of Medical College admission is not by a Holistic assessment of students as it does not encompass behavioral and social science concepts except traditional focus on scores in examination. Students are sometimes pushed to this profession against their will just to satisfy their parents' ambitions leading to a great failure on the part of the student in due course of time.

We must also have a system to know the aptitude and interest of the student which are sadly lacking in the present system of education. Schools and colleges do not have sufficient courses to instill ethics and moral values.

We very often get complaints of misbehaviour on doctors from patients and attendants of patients in the medical college requesting for a solution or a punishment to the doctors. Here, I must say that the solution is not impingement of punishment but it is the rectification of behaviour on either side. A student enters the medical college minimum at the age of 18 years with full grown personality. This personality cannot be changed but can be shaped to some extent with effort. The role of parents and the environment in which a child is reared up cannot be ignored at all apart from genetic factor. Nobody in the medical college can bring a radical change in personality of a

medical student or a doctor, but can bring a change with quality effort.

It needs to be mentioned here that the college which had a dilapidated look a few years back had started to get a new look with necessary infrastructural development and with modern OT, wards, laboratories and hostels etc.

Most of the developmental work that were undertaken under the project TNEIF with a sanctioned amount of Rupees 100 crore by the present government have been completed except the bigger projects which are also going on in full swing. This has become possible only with the great initiativeness taken by our honorable Chief Minister Shri Sarbananda Sonowal and Dr. Himanta Biswa Sarma, honorable minister of Health and Family Welfare, Finance, PWD etc.

Achievements

- 1) Super Speciality Building: The construction of Super Speciality Building which started on 3rd September 2016 is at the final stage of handover to authorities.
- 2) The construction of Dental College is going on well, though the outbreak of COVID-19 has brought a great setback on its speed. But hopefully it will be completed by another one year.
- 3) A.R.T. Simulator in collaboration with DEA/AERB and BARC is in the final stage of installation.
- 4) As desired by the honorable Health Minister Dr. Himanta Biswa Sarma the proposal for construction of multistoried building, in place of the present remaining old Assam type buildings, with all modern facility have already been sent to the government.
- 5) A linear accelerator that was approved by Tata Trusts is in the final stage of installation after some rectification in the bunker meant for it.
- 6) Nearly all the bylanes inside the campus have been reconstructed with a new look and fulfilling a long standing demand of the people residing in the area.
- 7) The construction of the Level 1 Cancer Hospital is going on with the help of modern technologies and would be completed by September, 2021.
- 8) All the green house projects like,
 - z Construction of 350 bedded Boys Hostel
 - Construction of Blood Bank with Modular OT.
 - State of Art Morgue with Mortuary.
 - Vertical Extension of 225 boys Hostel.
 - Vertical Extension of Dr. Sarita Toshniwal Ladies Hostel
 have got their necessary approval and construction works are going on.
- 9) After a long delay, the much awaited appointment of 150 numbers of staff

nurse have taken place and most of them have joined the college. Though less in number than expectation their entry have given some relief to the inconvenience created by the presence of very less number of nurses in the college.

Projects in the pipeline

- 1) Four numbers of manifold are coming up within a short period of time to cater the need of smooth supply of Oxygen gas in O.T.s and in the ICUs.
- 2) Two numbers of Cryo oxygen tank are also going to be installed in the designated space of the college very soon.
- 3) Installation of two numbers of Medical Gas Generation Plant for Medical Oxygen Gas refilling will be done very soon.
- 4) Though the government has taken up steps for improvement of this college and inspite of all round development in infrastructure, academic activities and patient care, the college has got some vital issues that are to be addressed by the government
 - Number of sanctioned Grade III, GradeIV and Nursing post at AMCH are proportionately far less compared to the medical colleges like Jorhat Medical College, Barpeta Medical College and Tezpur Medical College.
 - Though the widening of the approach to AMC has been done recently giving relief to the public, the marking of adequate space for parking outside the campus has not taken place.

Academic and Research activities

- The undergraduate (MBBS) and Post Graduate students of AMC have been showing good results in the recent years under Srimanta Sankaradeva University of Health Sciences.
- Number of faculties have also undertaken research works under Indian Council of Medical Research and from other Central Government funds and quite a good number of different project works are going on in a very good pace.
I thank them all and hope they will continue to do this type of work.
- Number of faculties have already been recognised as PhD guide in different medical subjects and some are in the pipeline. This is a remarkable achievement and quite a good number of students are pursuing PhD course in various

subjects under the guidance of those faculties.

Other important activities

In the present situation of COVID-19 pandemic the services rendered by all categories of health workers like faculties, Junior Doctors, nurses, technicians, cleaners and wardboys and other Health workers are undoubtedly commendable. I am really indebted to these warriors and to all my teams who have been working tirelessly in this fight against COVID-19.

Our faculties from Medicine, Pediatrics, Anesthesiology, Preventive and Social Medicine, Microbiology and Pathology are the forerunners for prevention, management of COVID-19 outbreak. They have visited different districts like Dhemaji, Lakhimpur, Charaideo, Sibsagar, Tinsukia apart from our own district Dibrugarh several times to impart training to the doctors and health workers of the periphery for dealing effectively with COVID-19 outbreak. They deserve a great appreciation.

Working day and night the department of Microbiology have already done about 85,000 RTPCR tests in the laboratory starting from May 2020.

19385 number of RAT test have also been done to till this date and both the test will be continued as long as these are required.

Finally, I would like to thank and acknowledge the cooperation, help and support that we have received from the District Administration at times of our need and specially during this COVID-19 Pandemic and would also hope that both will always maintain a cordial and fruitful relation along with mutual trust and faith.

Long Live Assam Medical College.

Case findings and data collection is not easy process in general hospital patients may attend number of various clinics.

During this long operation period many more project on cancer has been sanctioned by ICMR at different periods of time, some of which has been successfully completed and some still continuing.

The data of HBCR provide necessary support to Postgraduate students for long, those who interested in doing research work in the field of Cancer. During the period 2019, a total number of 1048 new cancer cases were registered. As compared to male female cases shows gradual increasing trend.
